

How to Open an Encrypted Email from the Family Care Safety Registry

The Family Care Safety Registry (FCSR) uses encrypted email to send notifications containing sensitive information, such as background screening results. The emails are encrypted by Proofpoint software. Follow these simple steps to create an account in Proofpoint to access your encrypted email.

Important Note: You may encounter difficulties opening an encrypted email through a mobile device application. Try to use your mobile device's web browser to access your email, or use a laptop or desktop computer to open your email application.

Your encrypted email from the FCSR will look like the example below. Click the blue "Click here" link in the body of the email message by the date shown, or if that date has passed, open the attachment named **SecureMessageAtt.html**.

Family Care Safety Registry Correspondence for [REDACTED] [ENCRYPT]
